

PauseAm team

Innovation & Enterprise | PS2: Voice-First Access

Kayode Popoola - Team lead

Kayode is Head of Sales and Business Development at Secret Network Foundation, a blockchain intelligence and financial crime analyst, and a member of the International Association of Financial Crime Investigators.

He leads product direction, payment-safety content, partnerships, user research and validation. His work connects the product's payment-verification and reporting journeys with the needs of students, everyday users and small businesses.

Suleiman - Technical lead

Suleiman leads application engineering, N-ATLaS integration, model hosting, deployment and testing. He is responsible for reproducibility, operational monitoring and the technical evidence package.

Responsibilities

Kayode coordinates testers, reviews guidance and feedback, and leads distribution and sustainability planning. Suleiman maintains the frontend, backend and model adapters, investigates defects and manages release checks. Both members review the final application and evidence.
