

Endorsement / registration checklist

PauseAm | Innovation & Enterprise | NAIC 2026

Required document

The Innovation & Enterprise portal requires a CAC certificate for a registered entity or a valid government-issued ID for an individual developer.

Portal: <https://ondi.innox.africa/apply/naic/naic-innovation-enterprise>

Prepare the upload

Choose the document that matches the applicant type. Check validity, readable scans, complete pages and matching applicant or entity names. Confirm the accepted file type and size shown by the upload control. Use an organisation's certificate only with its authority.

Handle privately

Keep the original certificate or ID in private storage. Exclude identity documents from the public repository, app assets, research exports and demo video. Upload the required certificate or ID directly to the authenticated portal after checking the file. This checklist accompanies preparation; the certificate or ID is the registration evidence.
