

07 — Endorsement / registration checklist

Status: PRIVATE OWNER REVIEW PENDING. Kayode reports having a CAC certificate and valid ID. Neither has been inspected or uploaded by the build agent. This checklist is not the required document and must not be submitted in its place.

Exact portal inspected 1 October 2026: <https://ondi.innox.africa/apply/naic/naic-innovation-enterprise>

The Innovation & Enterprise page requires a PDF with a CAC certificate for a registered entity or valid government-issued ID for an individual developer. It lists 1–6 members, Nigerian individual applicants aged 18+, and at least 50% Nigeria-based members for diaspora teams. NCAIR's summary differs on team-size range; this two-person team fits both.

Choose the correct applicant type. Do not use an employer's CAC certificate without authority. Detailed accepted ID types, size limits and upload rules remain unverified behind sign-in.

Keep the original document encrypted and private, outside Git, app assets, research logs and video. Review validity, legibility and name matching locally. Confirm the authenticated portal's redaction requirements before preparing a copy. Only Kayode uploads after final review. No ID was requested in chat, copied, published or uploaded; no ONDI application was submitted.
